Church "House of the Architect"

House of Prayer of the Church "House of the Architect"
The Church "House of the Architect" is part of the Association of Missionary Churches of Evangelical Christians of Ukraine. It was originally planned as a local church. Construction has been going on for quite some time, about 10 years, by the efforts of parishioners.

Fakten zum Projekt

Kyiv, Ukraine

Fertigstellung
2017

Gebäudetyp
Kommunales

Product systems
Flächenheizung und -kühlung,
Flexible Rohrsysteme

Art des Projekts
Neubau

Partner

Architect - Georgy Dukhovichny
Installation - IVIK LLC

The church building is a new construction of a room for visiting parishioners for 1200 people
The task is to heat the warm floor of the passage gallery and the audience area of the amphitheater of the prayer hall. The Uponor Classic system with a PEX-a ø17 pipe was used. The unusualness of the task is that the amphitheater covering will consist of wood, which will also be a place for seating.
The church premises are located in the Dniprovskyi district of Kyiv, not far from the Lisova metro station.
The architectural project was developed by the famous Ukrainian architect G. S. Duhovychny (d. in 1997–2005).
The total heated area is 5 thousand m2
The total number of Ø17 pipes is 16 thousand m/p
The proposed technical solution was to be convenient for comparison with the solution offered by other manufacturers-suppliers. The key factors for choosing a supplier were high quality and competitive price. Uponor products were selected based on both criteria. Design and installation were performed by our partner, IVIK.
