Uponor Aqua Ambient linear shower inlets

Level showers are enormously comfortable. They allow threshold-free entry into the shower cabin and offer a higher level of movement than conventional showers. To fully complete this shower experience, the right drain inlet is needed.

The Uponor Aqua Ambient inlets drain the water via elegant stainless steel profiles. Whether in spas, at home or sport facilities - Uponor Aqua Ambient ensures harmonious flooring without tripping hazards. The system is available in different variants and sizes. Due to the height adjustability the installation is very simple. The removable metal bar allows cleaning in seconds.

The shower inlets to match all floor constructions.

The Uponor Aqua Ambient inlets come in two different sizes and variants – as high or low siphons in form of the black or silver line to match every construction.

Application facts

The high and low Uponor Aqua Ambient inlets provide:

- Modern design and appearance
- Gently finished edges
- Stainless steel finish
- Perfectly smooth, flat surface and no unnecessary thresholds
- Prolonged durability of the waterproofing layer in the floor
- Additional sealing flange ensures imperviousness
- Product range from 600 to 1000 mm
- Available in black or silver as high or low siphon version

Height adjustment:

Properly level the drain during installation and facilitate mounting to the ground.

Modern design:

Perfectly smooth surface.

Fits all conditions:

High and low siphons and complete sized portfolio allow installation in different environments. 360-degree rotating siphon in low version.

High-quality:

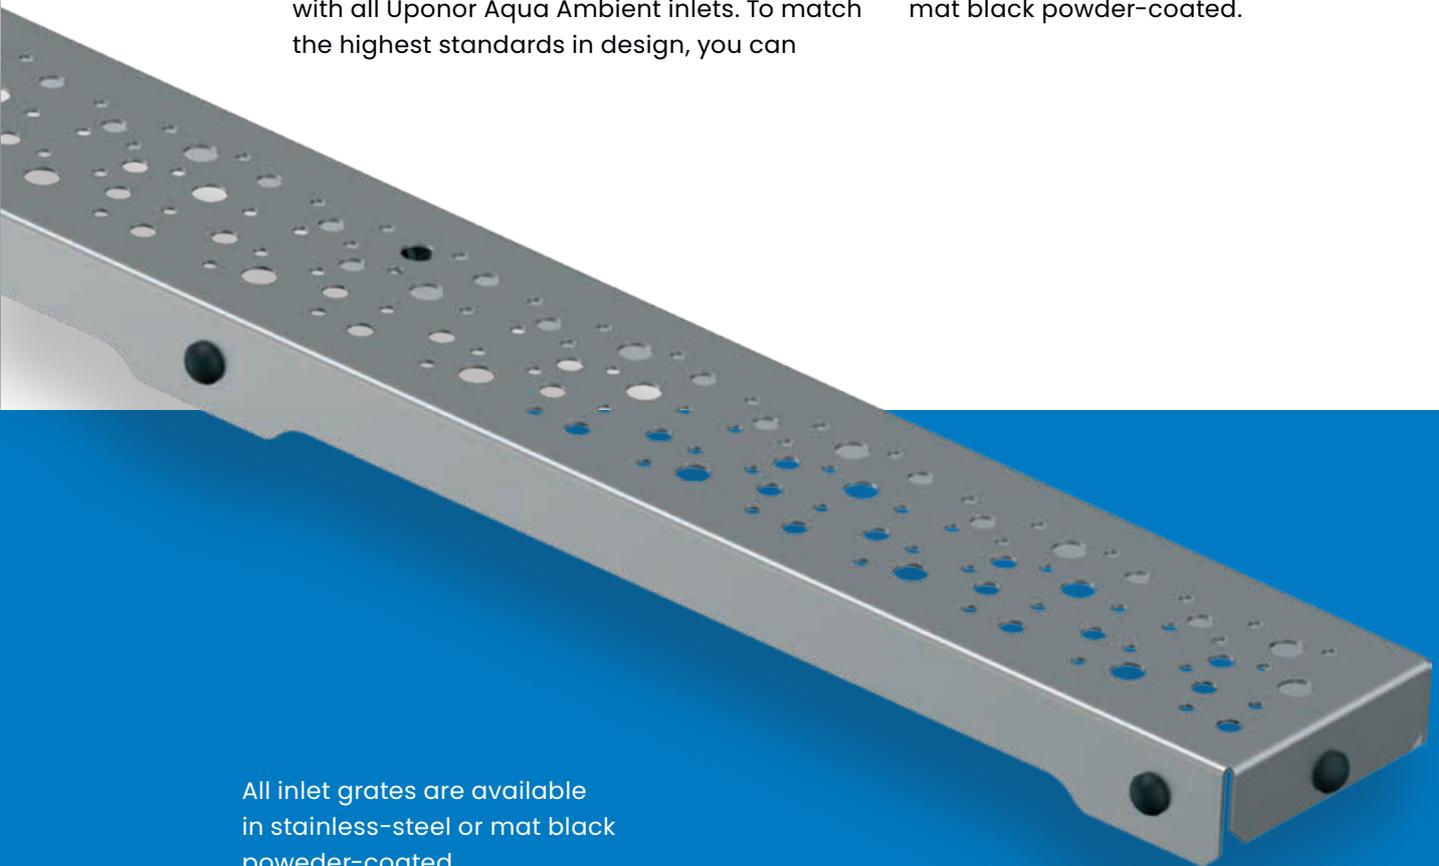

Stainless steel and plastic components, technically fully proofed for high resistance to chemicals and temperature.

➤ Designed to provide comfort

Uponor Aqua Ambient linear shower inlet grates

The variable designs of grates are compatible with all Uponor Aqua Ambient inlets. To match the highest standards in design, you can

choose the different variants in stainless steel or mat black powder-coated.

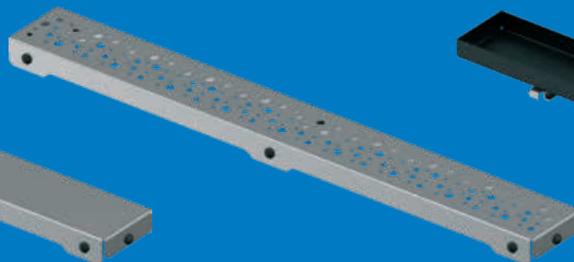

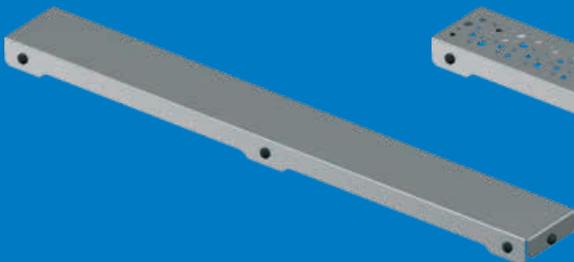

All inlet grates are available in stainless-steel or mat black powder-coated.

Various, modern designs.

Uponor Point drain inlets

Uponor Point drain inlets provide the classic compact form for ground-level showers or bathroom drainage. This minimalist variant of the water drain is popular at home in swimming pools or at spa areas. The drain performance remains high, no matter which

design you choose. Only the highest quality materials are used for the production. The inlets are available in several variants – stainless-steel or plastic, with or without colour and in diameter 50 for Classic and Super or diameter 50 or 110 for the Standard version.
